

Sprint 3 Plan

Product Name: Slug Hub

Team Name: Slug Hub

Sprint Completion Date: July 22, 2019

Revision Number: 3.0

Revision Date: July 22, 2019

Goal Description:

The goal of Sprint 3 is to finish the UI/UX of our application, as well as finalizing server components, and the loading bar.

Task Listing:

- (21) As a user, I want good looking buttons on the homescreen that look like the apple application icons
 - (1 hr) find the right icons for each category
 - (1 hr) find the right margins and spacing between icons, for all screen displays
- (21) As a developer, I want buttons for all the functions I built, so the user can use all the software that I built for the user
 - (1 hr) Creating buttons on homepage
 - (1 hr) Creating navigation buttons for advising
 - (1hr) Creating buttons for CS_BS Page
 - (1hr) Creating buttons for JBE Page
 - (1 hr) Create navigation buttons for all athletics pages
 - (2 hr) Create buttons for dining pages
- (8) As a user, I want the UCSC plaque for the skeleton, so the app feels welcoming and UCSC themed
 - (1 hr) make the image fit the screen
- (21) As a student, I want options to have a good, clear layout, so I can navigate the whole app easily
 - (1 hr) Reformat options for advising page
 - (1 hr) Add background to dining
 - (1 hr) Add background for Engagement part
 - (1 hr) make button text black for advising
 - (1 hr) Added background image to cs_bs
 - (1 hr) Added extra button for CMPS -> CSE course offerings
- (13) As a student, I want to render photos quickly, so that I can enjoy using the app more
 - (1 hr) make all images .png
- (21) As a user, I want a nice welcoming loading screen on the app startup, for a good UX
 - (1 hr) Add a progress bar
 - (3 hr) Transition pages once the progress bar is complete

- (1 hr) Make pictures transition while the progress bar is loading
- (13) As a user, I want to app to not have any unnecessary content, so it is less bloated
 - (1 hr) delete all unnecessary imports
 - (1 hr) delete all unnecessary files
 - (1hr) delete unnecessary functions
- (8) As a developer, I want to finish the work I started (calendar, map), so I didn't waste any of my time.
 - (1 hr) make a link for maps in facility
 - (1hr) make a link for calendar in home
- (21) As a developer, I would like to automate sharing files across a server, so that it can save time
 - (1hr) Use Paramiko to transfer files
 - (2hr) Create a uniform command line interface
- (89) As a developer, I would like the code to be clean and consistent, so that I can continue the project in the future.
 - (6hr) Cleaning code and documentation for the entire project
