Sprint 2 Plan

Product Name: Slug Hub
Team Name: Slug Hub
Sprint Completion Date: July 15, 2019
Revision Number: 2.2
Revision Date: July 9, 2019

Goal Description:
Sprint 2 goal is to create some widgets for campus resources student can get. If there is any extra time, we will focus on .

Task Listing:
- (3) As a student, on the homepage, I want an engagement button, so that I can be involved with student life
- (3) As a student, I want a button that takes me to the library room reservation page/LSS tutoring page so that I can find places and people to study with.
- (55) As a student, I want a button to know what clubs are available, so I can pursue my interests
    - (2hr.) Divide clubs into a set number of categories
    - (4hr.) For each category, link to a page listing all of the clubs of that category
    - (8hr.) For each club, link to a page about the club.
- (13) As a student, I want a button to be able to form study groups for my classes, so that I can meet with classmates and study better
    - (5 Min) Create SlugHub email
    - (5 min) Create instructor Grepthink account and course
    - (1 hr) Create page with link and description of how to enroll in SlugHub course
- (34) As a student, I want a button to know about Greek Orgs, so that I can look into joining one.
    - (3 hour) After the user navigates to the GLO subpage, show all organizations in UCSC for them to make a further choice.
- (34) As a student, I want a button to know what sports are available, so that I can join a sport.
    - (10 min) Create intramural link
    - (10 min) Create goslugs link (NCAA)
    - (10 min) Create sports clubs link
    - (1 hour) Look sporty and UCSC-y
- (21) As a student, I want to see an academic calendar on my homescreen, so I can know when important deadlines and school events (OPERS fest, concerts) are approaching

- ○ Analysis the .ics file and learn google script
  - ○ design a Task List in APP
- ● (3) As a developer, I want to make my files easy to manage
  - ○ (2h) Repath all files into respective folders
- ● (34) As a developer, I want a server to run all of the app's data intensive programs, so that the app feels light to use.
  - ○ Get the server which to be public, the app can reference to it easily
  - ○ Setup Flask
  - ○ Create dictionary in Python
  - ○ Generate dictionary using prefix and title
- ● (21) As a user, I want the theme of this app to be UCSC related, so that I know this app was made specifically for UCSC
  - ○ re-design the theme
